Target version:		Tested:	No
Operating System:	Any		
Version:			

Description

Some clients/partners using the virtual printer have expressed the wish to not have the 'Help' button in the virtual printer screens.

--

To be compatible with current version, the idea may be :

- if the help url is defined to empty in the virtual printer configuration, then do not display the 'Help' button
- if the help url is defined to 'something' in the virtual printer configuration, then display the 'Help' button

History

#1 - 08/01/2014 08:43 AM - Maxime Merle

- Description updated

#2 - 10/17/2014 10:39 AM - Pierre Marc

- Status changed from New to Resolved

This is already the case. The help buttons are not display if their corresponding text is blank.
