Version:	4.8.003			

Description

Using a CentOS 6.8 OS
Is it possible to make the NAP's NVS application start automatically on a reboot of the OS.

If so how?

Note I'm assuming it'll be the same as a RedHat OS

Hi,

This is linux feature

see on https://www.centos.org/docs/5/html/Installation_Guide-en-US/s1-boot-init-shutdown-run-boot.html

Kind regards
