<b>Description</b>			
<p>In System &gt; Parameters screen, you display some information on the JVM runtime. More specifically, you seem to display the vm name (java.vm.name), the vm version (java.vm.version) and the vm vendor (java.vm.vendor).</p> <p>Could you add the java version to this information ? It should be the java.runtime.version property.</p> <p>Thank you</p>
