Description

What is the structure of the User Profile to be created within the container pointed to by SERVER_UPLOAD_PROFILE_CONTAINER

The documentation "interface_iv_nirva.pdf" refers to an INDSTRINGLIST called PRINTING_MODES containing TUNNEL, ASYNC and/or STANDARD, though it doesnt say if these are the keys or values and what the counter part is. i.e. is these are the Keys what is expected for their values.

What other objects (if any) are expected in the user profile container.

Many thanks

- Status changed from New to In Progress
- Assignee set to Pierre Marc
- Target version deleted (1.24)

This is a small documentation bug. Pleaser read "stringlist" instead of "indstringlist" so PRINTING_MODES is a stringlist type object. Depending of the value of PRINTING_MODES, the profile container may contain some other objects. These are described page 13 and 14 of the interface_iv_nirva.pdf documentation. We are going to modify the documentation.

Hope this helps

#2 - 08/08/2012 09:39 AM - Pierre Marc

- Status changed from In Progress to Resolved
- % Done changed from 0 to 100
- Tested changed from No to Yes

The documentation has been updated.
