Description

When the number of files to concatenate is quiet important, the CONCAT command fails with a an error code telling that some files are not found.

History

#1 - 10/05/2012 10:10 AM - Pierre Marc

- Status changed from New to In Progress
- Target version set to 2.15

This is a bug due to a buffer limitation on the IN parameter of the CONCCAT command. This will be corrected in v2.15.

#2 - 10/05/2012 10:12 AM - Pierre Marc

- Status changed from In Progress to Resolved
- % Done changed from 0 to 100
- Tested changed from No to Yes

Corrected in v 2.15. We change the static buffer to a dynamic memory allocation in order to avoid any limitation. The same correction has been made for the PAGE parameter of the MERGE command.
